Amanathganj, Barisal Sadar, Barisal

SUMMARY

Dedicated and results-driven Flutter Developer with 1.8 years of experience building high-performance, cross-platform mobile applications. Experienced in developing scalable apps across Fintech, E-commerce, Car Rental, and Service Booking domains. Skilled in responsive UI development, REST API integration, and state management, with a strong focus on clean architecture, performance, and maintainable code. Committed to delivering scalable Flutter solutions that enhance user experience and product reliability.

EXPERIENCE

Junior Software Developer

AppDevs

07/2024 - 02/2026 Mirpur DOHS, Avenue 11, 1188, Dhaka

- Mobile Application Development:** Designed and developed production-grade cross-platform mobile applications using Flutter, delivering scalable solutions with complex UI/UX and robust REST API integrations.
- Domain-Focused Solutions:** Played a key role in building applications across multiple business domains including Fintech platforms, E-commerce systems, Car Rental services, and Service Booking solutions, ensuring reliable and high-performance user experiences.
- Real-Time Communication Systems:** Implemented video/audio calling and live streaming capabilities by integrating ZegoCloud SDK, enabling seamless real-time communication within mobile platforms.
- Real-Time Data Architecture:** Developed WebSocket-based real-time data flows to support live updates, dynamic user interactions, and responsive application states.
- Payment & Financial Integrations:** Implemented secure payment gateway integrations for fintech and commerce applications, ensuring safe and reliable transaction handling.
- Scalable State Management:** Architected maintainable application state using Provider, BLoC, and GetX, applying structured patterns to improve scalability, modularity, and performance.
- Advanced Mobile Platform Features:** Implemented Deep Linking and App Links to support user acquisition campaigns, seamless navigation flows, and improved cross-platform accessibility.
- Code Quality & Architecture:** Focused on writing clean, modular, and maintainable Flutter code, applying best practices for application architecture, performance optimization, and long-term scalability.

EDUCATION

Diploma in Computer Science

Infra Polytechnic Institute, Barisal

10/2020 - 01/2025 Kashipur, Barisal Sadar, Barisal

SKILLS

Mobile Development

Flutter Dart Responsive UI

Adaptive Layouts Custom Widgets

UI/UX BLoC GetX Provider

Clean Architecture Git/GitHub

Problem Solving MVC/MVVM OOP

Networking & Backend Integration

REST API Integration WebSocket

JSON Parsing API Authentication

Deep Linking / App Links

PROJECTS

adMart – Online Grocery & Pharmacy Multi-Vendor Platform

- Developed the entire Flutter mobile application from scratch, implementing scalable architecture and reusable UI components.
- Optimized API communication and complex data handling to ensure smooth performance across large product datasets.

CarBid – Ride Auction & Bidding Platform

- Developed the ride auction platform where drivers bid competitively for ride requests.
- Implemented real-time ride request and bidding workflows within the Flutter mobile application.
- Integrated APIs to manage ride requests, bid submissions, driver-passenger interactions, and transaction handling.

SalonHub – Spa & Salon Booking Management System

- Developed a modern service booking mobile application for spa and salon businesses.
- Integrated service-based APIs for dynamic pricing, booking workflows, and service catalogs.
